# Weigh India

<http://www.weighindia.net/>

We have emerged as the leading manufacturer and exporter of precision weights and mass standards. These weights find application in pharma, chemical and allied industries.

Laboratory Measuring Weights

Brass Weights

## About Us

Established in the year 1984, **Weigh India** is engaged in **manufacturing, exporting and supplying brass weights, stainless steel weights and mass standards**. Our production comprises of **Laboratory Weights, Medium Accuracy Weights and Carat Weights**. To provide the flawless **measuring weights**, we follow international standards of accuracy.

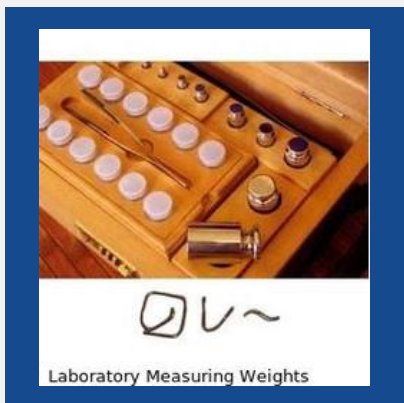

Our manufacturing range for these brass weights and stainless steel weights covers all the denominations from 1mg to 50kg for M2 to E2 class and 1mg to 10kg in E1 class, which is the highest accuracy class of weights in the world. We are fully dedicated to achieve the highest level precision necessary to meet the ongoing requirements for uninterrupted development in the field of Science & Technology.

Under the guidance of our mentor **Mr. Shekhar Singhania** with an industry experience of **26 years**, we have earned a meritorious position in the domain. Owing to our ethical standards and transparent business dealings, we have achieved trust of clients based in not only India but also in Denmark, Hungary, Indonesia, Ireland, Israel, Malaysia, Netherlands, New Zealand, Norway, Qatar, Saudi Arabia, Singapore, South Africa, Switzerland, Thailand, U.K. and U.S.A.
